

Company Profile

Ellsworth, Kansas, USA – February 2025 — Headquartered in Ellsworth, Kansas, Cashco has been a leader in innovative pressure control solutions for over a century. Established in 1920 as the A.W. Cash Company, Cashco has evolved into a global provider of advanced flow control technologies that ensure safety, reliability, and efficiency across diverse industries.

A Global Leader in Flow Control Solutions

Cashco manufactures a comprehensive range of high-performance control valves, pressure and vacuum relief valves, tank safety equipment, pressure-reducing regulators, and back pressure regulators. With line sizes ranging from ¼ inch to 24 inches and Cv values from .002 to 4,406, our products meet a wide array of industrial needs, including steam, air, oil, water, and chemical and gaseous fluids.

We offer specialized models for demanding applications such as slurries, cryogenic service, and corrosive fluids, with options for high-temperature and high-pressure environments. Many of our products are available in iron, brass, steel, and stainless steel, with soft or metal seats to suit various customer requirements.

Expanding Capabilities Through Strategic Growth

In 2024, Cashco partnered with May River Capital, a Midwest-based private equity firm, positioning us for continued growth through investments in innovation, new markets, and strategic acquisitions.

Over the years, we have expanded our product portfolio through key acquisitions, including Valve Concepts, Kaye & MacDonald, and Sensiflo—adding high-flow, high-purity, and tank blanketing solutions. Our global presence includes operations in Houston, Texas, and Hoppegarten, Germany, allowing us to serve customers across Europe, the Americas, and beyond with localized engineering, design, and manufacturing capabilities.

Commitment to Quality and Sustainability

Cashco upholds the highest standards of quality and environmental responsibility. Our ISO 9001:2015-certified Quality Assurance Program ensures exceptional performance and reliability in every product. Additionally, our ISO 14001 certification reflects our dedication to sustainable practices and environmental stewardship.

Customer-Driven Innovation

With a state-of-the-art engineering lab at our headquarters and a 20,000-square-foot expansion utilizing geothermal heating and cooling, Cashco remains at the forefront of product development. Our capabilities include machining prototype parts, testing in advanced environments, and introducing new technologies tailored to global markets.

Meeting Customers' Needs Globally

Our growing inventory and enhanced customer service operations enable us to deliver faster response times and cost-effective solutions. By streamlining business systems, investing in advanced machining technology, and maintaining an extensive component inventory, we ensure on-time delivery for replacement parts and project requirements.

A Bright Future Ahead

Led by an experienced leadership team and supported by May River Capital's strategic vision, Cashco is positioned for significant growth while staying true to its legacy of excellence. With a diverse product offering, a commitment to quality, and a focus on sustainability, we remain dedicated to delivering unmatched value to our global customers.
